

## **241 - TWO PERSONS FOR ONE JOB**

**JAMES HUDSON**

This book reveals a fascinating strategy to lift the American economy out of the doldrums into a new age of prosperity, productivity, and a happier life style. The concept is deceptively simple, but its ramifications are far reaching and revolutionary.

At its core, 241 is designed to tap the dormant energy of underutilized minds and bodies, bringing people into the work force who, for one reason or another, are currently out of work, under employed in jobs they don't like, or otherwise in limiting situations that do not utilize their true potential.

241 shows how millions will be able to learn new skills and out existing skills to better use. It opens up new horizons for people who feel trapped in their present situations.

This book tells how spouses, siblings, children, or friends of one job holder can learn the details and nuances of that job so well that they can temporarily replace that individual, augment the work force, or supplement the payroll. It will reduce the time lost for illness, accident, maternity leave, hunting season, and the numerous "excuses" employees have for taking a day or two off.

Great for industry and management, but even greater for the individual employees. 241 offers a new freedom from the tyranny of work for the employee, and simultaneously a significant boon to the employer. Turly a WIN-WIN process.

On the personal side, it may have socio-economic benefits that inspire spouses and families to share interests and have a fuller life of happiness and fulfillment.
